Two great products come together to **simplify** and increase the **efficiency** of your mouse hybridoma research and manufacturing capabilities.

### Quick Type-M

Mouse Monoclonal Antibody Isotyping Test Kit

#### Features:

- ◆ Simple 3-step process.
- ◆ Results in 5-10 minutes.
- ◆ Sensitivity exceeding 1.0 µg/ml.
- ◆ Detects both κ and λ light-chains.
- ◆ No instrumentation required.
- ◆ Proven product for over seven years.

### Quick Type-M

Mouse Monoclonal Antibody Isotyping Kit

Cat.No.	Pack Size	Qty.	Price/kit
---------	-----------	------	-----------

20110	10 tests	1kit	\$110
-------	----------	------	-------

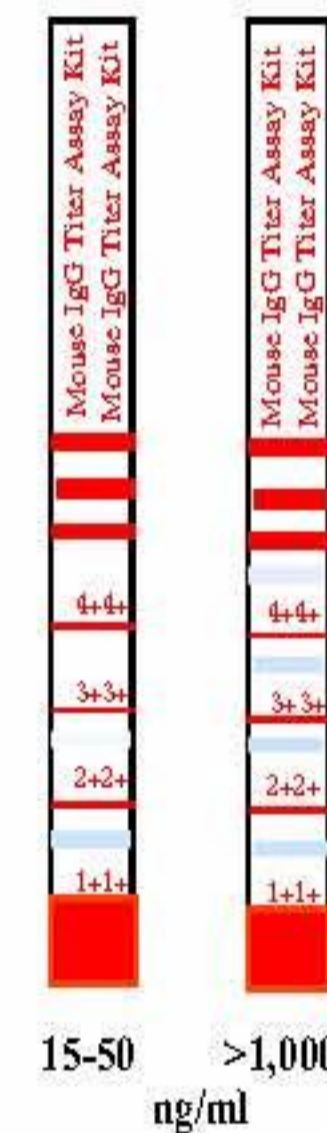

### Quick Titer-SQ

Mouse IgG Assay Test Kit

**New Product!**

#### Features:

- ◆ Easy to use semi-quantitative format
  - monitor ascites, cell culture and bioreactor production and purification.
  - screen serum antibody titers in mice (e.g. SCID's).
- ◆ Results in 7-10 minutes.
- ◆ Range from 15 ng to 1,000 ng/ml.
- ◆ Detects IgG's, IgA's, and IgM's.
- ◆ No instrumentation required.
- ◆ High quality antibodies ensures reliability.

### Quick Titer-SQ

Mouse IgG Assay Test Kit

Cat.No.	Pack Size	Qty.	Price/kit
---------	-----------	------	-----------

20210	20 tests	1 kit	\$130
